Tino Stefanoni
Serigraphies

The work of Tino Stefanoni, although not strictly belonging to that of conceptual art, has in fact always developed in the same area of research. In his works, is apparent the passing of a fine spirit of fun and playful. The real presences are reworked in a simple, seductive and mysterious imagery. The recovery of regressive forms of compositional strategies rooted in their children's creativity as in those of the primitive, are an important period of their survey of contemporary art, who wants to restore to man adult and technologized vibes go forgotten or lost.
